luisrudge

Qualifications

- Almost 10 years of experience in software development
- Strong open-source background
- Worked in both **Startup** and **Enterprise** environments
- **Public speaking** exposure (10+ talks, 4 courses recorded)

Work Experience

Technical Lead @ Browze (Canadian company – remote - website) 2021-03 – today

Building a new browse.com!

Engineering Lead @ Round Pegs Inc. (US company – remote - website) 2019-11 - 2021-03

Round Pegs' specialty is bringing your idea to life faster and cheaper by using no-code tools like Bubble, Adalo, and others.

- Leading a team of engineers in rebuilding critical services and infrastructure for a big enterprise
- Initial architecture design and prototype using Node.js, GraphQL, Oracle, PostgreSQL, React, and Tailwind CSS
- Overseeing cross-team collaboration and infrastructure evolution
- Executing technical interviews with candidates

Frontend Engineer @ Auth0 (US company – remote - website) 2017-01 - 2019-10

Auth0 is an identity management platform for application builders and developers valued at more than \$1.5 billion.

- Merged two open source projects into one to improve development efficiency and reduce overhead to maintain two similar libraries
- Modernized one of the most used JavaScript SDKs with a new build pipeline using **Rollup** as a bundler and **ES Modules** as the module system
- Participated in a team that pushed through a deprecation project of a legacy API. I implemented a new authentication spec in our browser-facing SDKs, wrote lots of migration guides and 'Quickstarts'. Most customers were able to migrate without significant code changes
- Built an opinionated authentication SDK in TypeScript focused on the most used features. It was released in 2019 and it's the official SDK as of today. It's the

building block used by other framework-specific SDKs, like **React**, Angular, Vue, etc.

Full Stack Developer @ RealROI (US company – remote - website) 2015-04 – 2016-12

Real ROI is all about maximizing their customers' Ad budget, improving KPIs by using proprietary tools and proven methodologies.

- Created the initial skeleton of the main backend infrastructure, using DDD, CQRS, and Event Sourcing using .NET (mostly C#, but used a bit of F# as well)
- Started adventuring myself building the ReactJS frontend application. It was my first contact with React and loved it. Spent most of the time creating what would become the frontend application
- Studied and tested several global state management solutions for the frontend project (Flux, Redux, Saga), eventually deciding to use MobX because of its simplicity and reactivity

PREVIOUS EXPERIENCES

Full Stack C#/.NET Developer @ Way2 Technology

o (Florianópolis - Brazil - website)

2013-04 to 2015-03

• Full Stack C#/.NET Developer @ Tecnologia Única

o (São Paulo - Brazil - website)

2011-06 to 2013-04

SIDE PROJECTS

• Tech Founder @ DePoster Inova Quadros

o (Florianópolis - Brazil - website)

2019-12 to today

• Tech Founder @ Unic Learning

o (São Paulo - Brazil - website)

2012-02 to today

SKILLS

- JavaScript
- Node.js
- React
- GraphQL
- Rest APIs
- Relational and NoSQL databases
- Git
- Tailwind CSS
